

Commercial & Industrial Web Based Software

For Heavy Civil & Sitework Contractors

Track every machine on every jobsite.

Iron makes you money when it runs and costs you money when it sits. Blackhawk gives every excavator, dozer, truck, and roller its own record: specs, hour meters, jobsite location, service log, and a pre-operation inspection checklist your operators complete from a phone.

Put a QR sticker on the machine. Scan it, inspect it, log the service, and roll the hour meter forward. The office sees everything in real time, and the printable records are there when the auditor or the safety man asks.

What you can manage

Excavators

Full spec records with photos, service logs, and hour tracking

Dozers & Graders

18 site development equipment classes in one system

Trucks

Dump and water trucks with tag number and tag expiration tracking

Skid Steers & Loaders

Pre-operation checklists matched to the machine

Telehandlers & Forklifts

Rough terrain forklifts, telehandlers, and yard forklifts

Aerial Lifts

Lift inspections with automatic notification emails

Vehicle Fleet

VIN-keyed maintenance records, service history, and bulk CSV import

Tool Management

Tool registry with calibration reminders and assignment reports

Reports

More than 20 automated reports delivered to your inbox

Employees

HR records with role-based access to sensitive data

Time Clock

Simple employee time entry from any device

Safety Program

Weekly safety meetings, audio safety talks, and completion tracking

How it works

1. Sticker it

Put a Blackhawk QR sticker on every asset. Each sticker is registered to that exact record.

2. Scan, inspect, log

Scan with any phone and the record opens: complete the checklist, log the service, snap a photo, done.

3. Reports come to you

Automated email reports keep the office ahead of expirations, inspections, and activity.

Every account includes

- ✓ QR codes for every machine, scan to open the record
- ✓ Hour meter tracking with service intervals and history
- ✓ Printable inspection checklists and maintenance lists
- ✓ Automated weekly and annual email reports
- ✓ Photo and document uploads on every record
- ✓ Full activity logs, every change is tracked
- ✓ Works on phones and tablets, installable as a mobile app
- ✓ Secure hosted service, nothing to install or back up

Federal Job Search, Paid add-on

Every morning, our system automatically searches SAM.gov for new federal contract opportunities matched to your work and delivers them straight to your inbox. Outage-aware retries and automatic catch-up mean you never miss a posting day. Federal work finds you, before your competition sees it.

See it for yourself

We will show you the system live, loaded with the same iron you run every day. Book a demo or request more information and we will get right back to you.
